

SOCIAL ACCOUNTABILITY STATEMENT

- In every community in which we operate, we aim to be a good neighbor. Our common goal is to improve the people's life and we want to be a key contributor to the quality of their life.
- We bring action, evolution, passion for development and economic benefits through our business activities. Besides, we support the local community through our investment program and long-term planning and help local suppliers and manufactures to develop themselves.
- In the last 50 years of operation, we continuously increase the number of employees having always been a profitable operation; we therefore contribute while creating wealth, paying taxes to the government and have a significant role in the areas of activity.
- We therefore believe that our company's growth and viability should include all actions to enhance the agricultural and environmental sustainability while being aligned with social growth and future prosperity for the community.
