

## ENERGY POLICY

**ASPIS S.A.** is committed to produce fruit juices and purees, aromas and oils, fruit preparations and canned products and control its energy efficiency, energy use and energy consumption, in accordance with national and international laws, rules, regulations and industry standards, and other identified interested parties, following a systematic approach to achieve continual improvement of energy performance, in a highly ethical manner.

### **Our goals are:**

- ✔ Commitment to Energy Management & Sustainability
- ✔ Meeting the needs and expectations of our interested parties.
- ✔ Energy Conservation.

The Company shall achieve its aspirations through:

- ✔ Meeting and exceeding the relevant energy performance legislation, regulations, and other requirements.
- ✔ Setting and continuously reviewing the energy performance objectives and targets, as well as providing adequate resources and shore-based support for their achievement.
- ✔ Providing appropriate training to all personnel, especially those whose work may create a significant impact upon energy performance.
- ✔ Supporting the participation of the employees and the consultation with them for improving the energy performance.
- ✔ Maintaining the facilities and their equipment in such a manner to always ensure their fitness for the intended service and energy performance.
- ✔ Supporting the purchase of energy-efficient products and services and design for energy performance improvement, by selecting and monitoring competent third parties to ensure appropriate standards of energy are achieved.
- ✔ Establishing effective communication and cooperation with third parties so they are aware of our energy expectations.
- ✔ Commitment to high ethical standards, to honesty and integrity.
- ✔ Maintaining energy performance excellence

## ENERGY POLICY

We integrate all these requirements and objectives in a Management System which is obligatory for all our employees and people working on our behalf. Top Energy performance is critical to the success of our business.

We shall continue to reduce the impacts of our operations through the efficient use of energy and Energy Management principles.

**We will:**

- ✔ Consult, listen to and respond openly to our customers, employees, neighbors, public interest groups and those who work with us.
- ✔ Work with our partners, suppliers, competitors, and regulators to raise the standards of our industry.
- ✔ Openly report on our energy performance whether good and bad.
- ✔ Recognize those who contribute to improve our performance.

Our business plans include measurable Energy targets and we are committed to meeting them all.
